

Core Values Activities

Overview

We express the *FIRST*® philosophies of *Gracious Professionalism*® and *Coopertition*® through our Core Values:

**WE EXPLORE NEW
SKILLS AND IDEAS.**

Pages 3-5

**WE USE CREATIVITY
AND PERSISTENCE TO
SOLVE PROBLEMS.**

Pages 6-8

**WE APPLY WHAT WE
LEARN TO IMPROVE
OUR WORLD.**

Pages 9-11

**WE RESPECT EACH
OTHER AND EMBRACE
OUR DIFFERENCES.**

Pages 12-14

**WE ARE STRONGER
WHEN WE WORK
TOGETHER.**

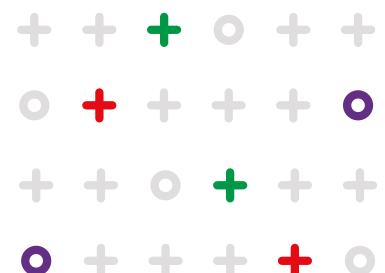

Pages 15-17

**WE ENJOY AND
CELEBRATE WHAT WE
DO!**

Pages 18-20

This booklet contains activities that will help you and your team develop and practice Core Values. You can use your team *Engineering Notebook* to log your progress.

Activity 1

Discovery

➡ Complete this activity and answer the guiding questions.

Did you know *FIRST* LEGO League is done all over the world? Find out how many countries have *FIRST* LEGO League teams. Choose at least three of those countries and learn how to say “hello” in the language they speak there.

Learn how to say “My name is...” in those languages.

WE EXPLORE NEW
SKILLS AND IDEAS.

GUIDING QUESTIONS

- Where can you find a map of where *FIRST* LEGO League is around the world?
- What resources did you find that are most reliable for translating?
- What other useful phrases could you translate?

Activity 2

Discovery

➡ Complete this activity and answer the guiding questions.

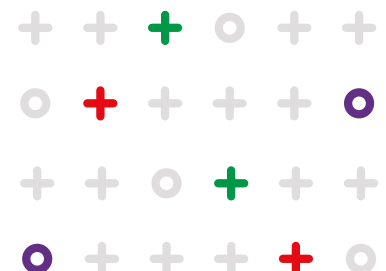

Learn about the four parts of *FIRST* LEGO League (game, engineering design, Core Values, project). What do teams at competitive events do for each part?

WE EXPLORE NEW
SKILLS AND IDEAS.

GUIDING QUESTIONS

- Do you know any teams who have competed before?
- If you were to compete at a competitive event, what would you have to do and how would you prepare?

Activity 3

Discovery

➡ Complete this activity and answer the guiding questions.

Interview a STEM professional to learn more about the necessary education for the career, day-to-day tasks, future directions for their field, and any other useful information.

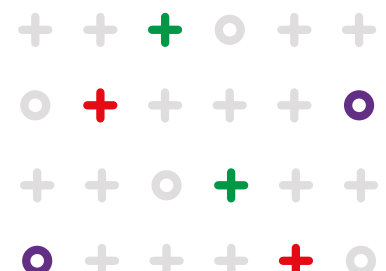

Select a professional to interview and prepare a list of questions to ask.

WE EXPLORE NEW
SKILLS AND IDEAS.

GUIDING QUESTIONS

- What do you want to learn about this profession?
- Does the information you find relate to the season theme?
- Can you use this information to help with your team's project or game strategy?

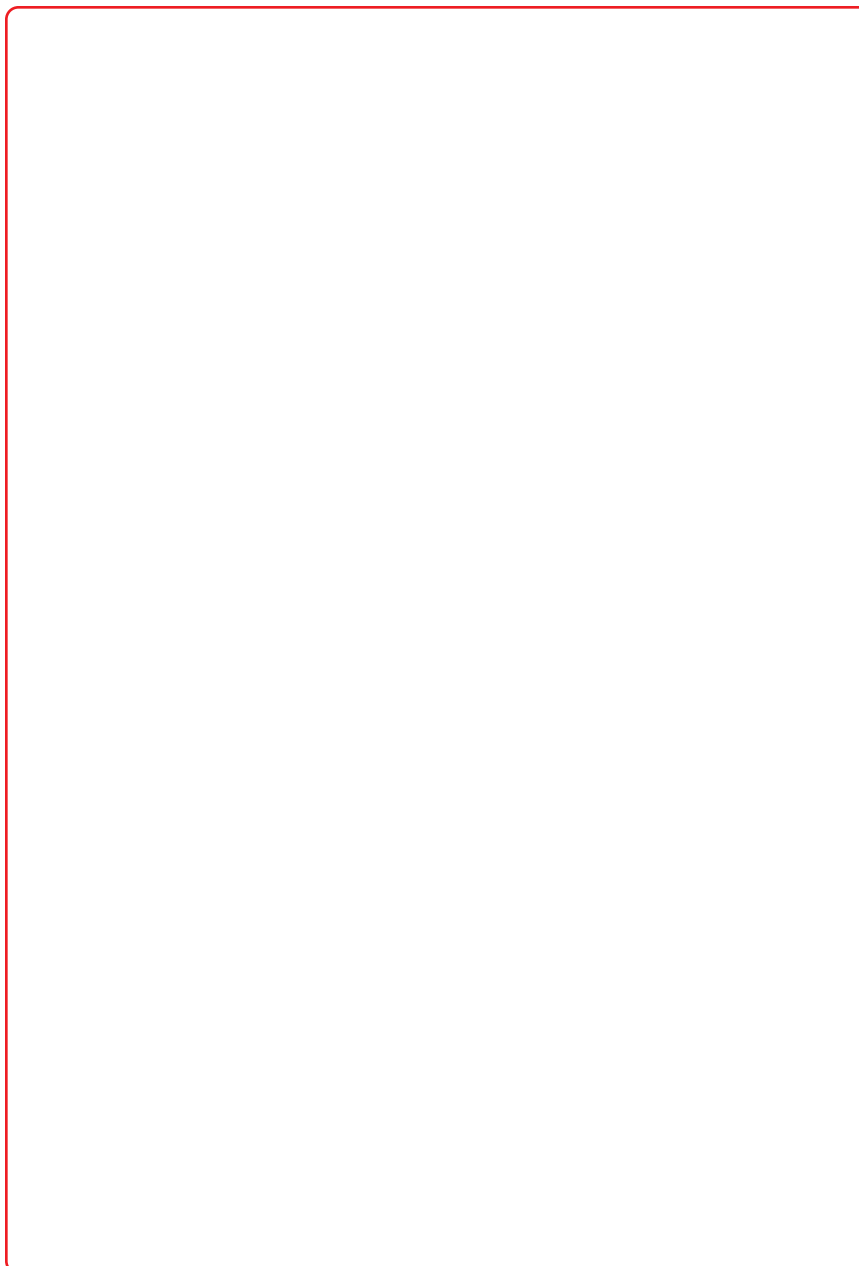

Activity 1

INNOVATION

➡ Complete this activity and answer the guiding questions.

How many ways can you innovate getting an object into a marked area on the floor?

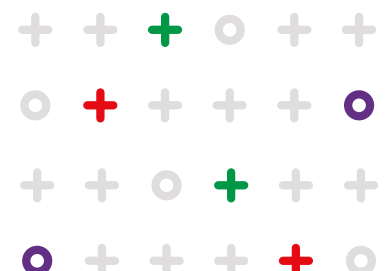

Choose an object (i.e. beanbag, tennis ball, or marble) and mark an area on the floor with tape.

WE USE CREATIVITY AND PERSISTENCE TO SOLVE PROBLEMS.

GUIDING QUESTIONS

- Try to divide into two teams and see which group can think of more ways.
- Did each group think of the same ideas?
- What materials did you use to accomplish this task?
- How many different ideas did each group think of?

Activity 2

INNOVATION

➡ Complete this activity and answer the guiding questions.

Storytelling is innovation! With your group, practice telling a story as a team.

One person starts by sharing a sentence, then take turns adding another sentence. Build off each other’s ideas and see how creative you can be.

WE USE CREATIVITY AND PERSISTENCE TO SOLVE PROBLEMS.

GUIDING QUESTIONS

- What topics will your team story cover?
- Try to make it harder by telling an alphabetical story. The first person must incorporate a word starting with “A”, then the next person uses “B”, then see how far you can go.

Activity 3

INNOVATION

➡ Complete this activity and answer the guiding questions.

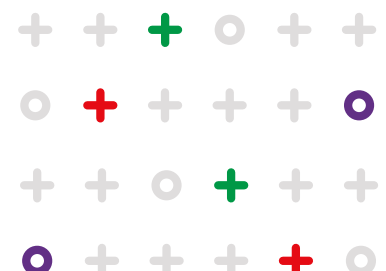

Teamwork makes the dream work! With your teammates, can you build something together? Each person will start with one LEGO brick (or other building material) and take turns adding to the build. Keep going, each person adding one piece at a time.

WE USE CREATIVITY AND PERSISTENCE TO SOLVE PROBLEMS.

GUIDING QUESTIONS

- How will you know when your build is done?
- How can you collaborate to make a cohesive build instead of just a random structure?
- Can you use the Engineering Design Process to iterate your builds collaboratively or make the building process better?

Activity 1

IMPACT

➡ Complete this activity and answer the guiding questions.

Choose a mission from the current season game. How does it relate to the season theme and encourage teams to make an impact? Brainstorm different ways of solving this mission.

WE APPLY WHAT WE
LEARN TO IMPROVE OUR
WORLD.

GUIDING QUESTIONS

- Where would you see this mission example in the real world?
- Try splitting into two teams. Each team should find their own solution to the mission, and then try providing feedback to the other team. Use the other team's feedback to iterate your team's solution.
- Could any of your solutions help you with your project idea?

Activity 2

IMPACT

➡ Complete this activity and answer the guiding questions.

Impact is all about making a positive change to improve our world. How does the current season theme for *FIRST LEGO League* make an impact?

Research a previous season theme. How does it aim to encourage teams to make an impact?

WE APPLY WHAT WE
LEARN TO IMPROVE OUR
WORLD.

GUIDING QUESTIONS

- What problems does the season theme ask teams to solve?
- How can teams use their projects to make a positive change in the world?

Activity 3

IMPACT

➡ Complete this activity and answer the guiding questions.

Write a list of ways you can give back to your local community and complete a mini service project. This can be as simple as leaving a positive note for your teacher or cleaning up trash in your local park.

WE APPLY WHAT WE
LEARN TO IMPROVE OUR
WORLD.

GUIDING QUESTIONS

- What are small ways to make positive changes?
- Who would your ideas help?
- What steps would you need to take to complete one of these projects?

Activity 1

INCLUSION

➡ Complete this activity and answer the guiding questions.

Gather building materials and your friends, family, or teammates for a collaborative building activity. Each person starts with the same number of pieces (they do not need to be the same) and builds something creative.

Even though you may have started with similar building materials, the end results can look very different.

WE RESPECT EACH OTHER
AND EMBRACE OUR
DIFFERENCES.

GUIDING QUESTIONS

- Compare your builds.
How are they different?
- How are they similar?
- Think about how this relates to inclusion. Other people have different ideas and experiences than you. How can we celebrate our differences?

Activity 2

INCLUSION

➡ Complete this activity and answer the guiding questions.

Think about the way teams play the *FIRST* LEGO League game every season. Brainstorm ways to make it more accessible to everyone. Test out your ideas. How can we do things differently that would better include everyone?

WE RESPECT EACH OTHER
AND EMBRACE OUR
DIFFERENCES.

GUIDING QUESTIONS

- How could you make playing the game easier for someone else?
- Can your ideas benefit everyone?

Activity 3

INCLUSION

➡ Complete this activity and answer the guiding questions.

Build a tool with your teammates using LEGO bricks. Each person can pick one brick and decide how it gets incorporated. Keep taking turns until your robot is finished. How can you use everyone's ideas to make one shared build?

WE RESPECT EACH OTHER
AND EMBRACE OUR
DIFFERENCES.

GUIDING QUESTIONS

- How do you make sure everyone's ideas are included?
- How do you make sure everyone can contribute?
- What are some ways to keep track of everyone's ideas?

Activity 1

TEAMWORK

🕒 Complete this activity and answer the guiding questions.

With friends or teammates, arrange each other in a certain order without saying any words to one another.

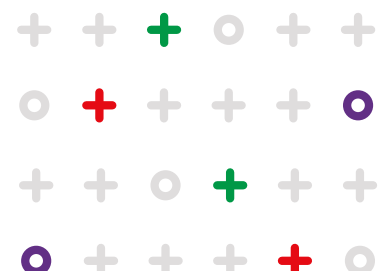

You could try arranging yourself in alphabetical order, by height, or in order of your birthdays.

**WE ARE STRONGER WHEN
WE WORK TOGETHER.**

GUIDING QUESTIONS

- How can you communicate with each other without speaking?
- How many different combinations can you think of?
- How can communication help your team work better together?

Activity 2

TEAMWORK

➡ Complete this activity and answer the guiding questions.

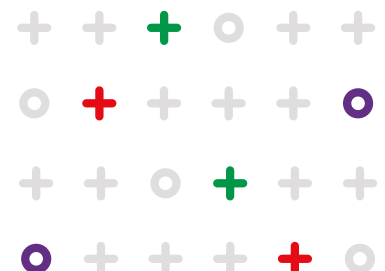

Close your eyes and let a friend or teammate guide you to build something out of LEGO bricks or other building materials. Without looking, your friend or teammate will use only their words to tell you what pieces to use and where to put them to make a build.

WE ARE STRONGER WHEN
WE WORK TOGETHER.

GUIDING QUESTIONS

- Start by thinking of something that is not too difficult to build with your eyes closed (i.e. a house). As you practice, make your builds more complex.
- What type of communication makes it easier for your teammates to understand your instructions?

Activity 3

TEAMWORK

🕒 Complete this activity and answer the guiding questions.

Think of a skill or talent that you know how to do, that you can teach a teammate. Pair up with a friend or team member and teach them how to do it.

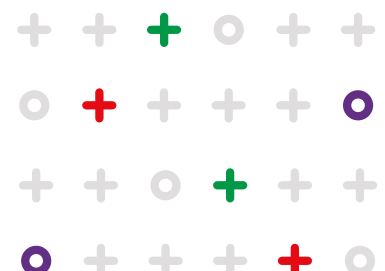

Use the space below to write down tips that you share or skills that you learn.

**WE ARE STRONGER WHEN
WE WORK TOGETHER.**

GUIDING QUESTIONS

- How can you make it easier for others to learn?
- How does teaching a new skill to your teammates require good teamwork?
- How can you adapt your teaching skills if people learn differently?

Activity 1

FUN

➡ Complete this activity and answer the guiding questions.

Code your friends or teammates to do your favorite dance move! Practice giving step-by-step instructions, just like how you would write code for your robot.

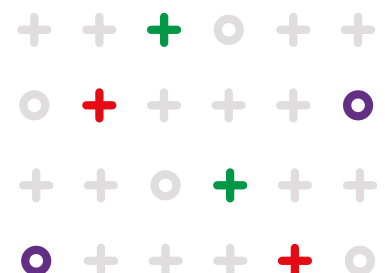

Write down the steps in the space below, and take turns testing out your instructions.

WE ENJOY AND
CELEBRATE WHAT WE DO!

GUIDING QUESTIONS

- What dance moves can you think of?
- How can you make your instructions more clear?
- How can you code movements to match the beat and tempo of a song?

Activity 2

FUN

➡ Complete this activity and answer the guiding questions.

Design a team mascot! Think about what you want your mascot to represent. How does it relate to your team and Core Values?

Design a costume for your mascot. It can be a drawing, done virtually, or use materials you already have to create something in real life.

WE ENJOY AND
CELEBRATE WHAT WE DO!

GUIDING QUESTIONS

- What do mascots represent?
What purpose do they serve?
- Will your mascot have a name?
- What do you want others to know about your team's mascot?

Activity 3

FUN

➡ Complete this activity and answer the guiding questions.

Create your own awards for your team. What does each team member do well that should be recognized? Decide as a team a list of awards and who to give them to.

You can create your own certificates on paper or build trophies with LEGO bricks!

WE ENJOY AND
CELEBRATE WHAT WE DO!

GUIDING QUESTIONS

- Get creative! These awards can be anything from Core Values to coding skills.
- What do you each do well as an individual and as a team?
- Can you think of any awards for the entire team?
